

PROFESSIONAL SUMMARY

Staff-level Full-Stack Engineer / Product Engineer with **15 years** of experience building **cloud-native platforms**, **enterprise UI** systems, **Go microservices** & reusable developer platforms. Turns ambiguous product needs into scalable architectures & production-ready systems, with **impact across 8+ products**, **5 engineering teams** & distributed EST/PST/BST/IST teams. Led platform initiatives that **reduced development effort by ~30%**; now extending this foundation into GenAI, RAG, agentic workflows & AI-assisted engineering.

TECHNICAL SKILLS

Front End: React, TypeScript, Tailwind CSS, Stencil.js, Figma, Cypress, Jest, Ember.js, Angular, HTML, Google Analytics

Back End: Go/Golang, Python, Java, REST API, gRPC, Kafka, Redis, PostgreSQL, MongoDB, SQL, Unix

AI & DevOps: GenAI, RAG, GitHub Copilot, ChatGPT, VS Code AI Assistant, GitHub Actions, Jenkins, Git

RECENT CAREER CONTEXT

AI Engineering Projects & Professional Development

Aug 2026 – Present

- Building hands-on expertise in GenAI, RAG, evals & agentic workflows. Developing a citation-grounded React.js documentation [RAG engine](#) using Python and an AI-assisted [portfolio](#) using Lovable, Codex & Vercel v0.

Planned Career Break – Family Caregiving

Aug 2025 – July 2026

- Planned family caregiving break after relocating to India; now fully available.

PROFESSIONAL EXPERIENCE

Staff Software Engineer, Hewlett Packard Enterprise

June 2017 – May 2025 | Durham, NC, USA

Product Leadership

- Served as hands-on technical **lead for 3 production product initiatives**, owning requirements, architecture, implementation, testing, dependency resolution & release readiness.
- Reduced implementation ambiguity & rework by converting vague product needs into **execution-ready system designs** spanning end-to-end workflows, UX, UI/API/DB contracts, dependencies, test strategy & tradeoffs.

Platform Engineering & Cloud Product Development

- **Reduced** UI development **effort by ~30% across 8+ products over 3+ years** by leading the design & development of a library with **~60 reusable UI components** using React, Tailwind CSS, TypeScript & Figma.
- Drove adoption across **5 teams** by managing it as an **internal open-source platform** with GitHub issues, contribution guidelines, changelogs & release management. Built a **self-service developer platform** using Storybook having each component's UX patterns, API spec & live editable examples.
- **Reduced** upgrade-related support **escalations by ~5%** by developing a **software allow/deny microservice** that centralized software-upgrade eligibility checks across support-assisted and customer self-service workflows using Go, REST API, gRPC, PostgreSQL & Docker.
- Enabled metadata-driven management of data-center objects by developing a **tagging microservice** using Go, REST API, gRPC, PostgreSQL, Kafka & Docker for tag-based search, filtering & grouping of data-center objects.
- Standardized cross-product UI patterns across **2 production apps** by developing **~10 reusable web components** in Stencil.js & Tailwind CSS.
- Improved maintainability & scalability of the data center production UI serving a **10K+ customer installed base** by rebuilding **16 screens across 8 storage workflows** using React, TypeScript Tailwind CSS & TanStack Query.

Quality & Accessibility

- Reduced visual regressions by **~15% across 6 repositories** by leading the end-to-end delivery of a **Cypress + GitHub Actions** platform that automatically detects visual regression on each PR commit.
- Reduced accessibility defects & compliance risk for **4+ UI products** by leading **WCAG 2.2 AA adoption** & implementing automated A11y testing with linters, Cypress tests & keyboard/mouse/screen-reader workflows.

- Improved code consistency & delivery quality across **8+ products** by **standardizing frontend UX patterns** like validation, error handling, retries & stale-data management.
- Accelerated development, testing & documentation using ChatGPT & VS Code **AI-assisted development** workflows.

Senior Software Engineer, Nimble Storage (Acquired by HPE)

April 2015 – May 2017 | San Jose, CA, USA

- **Improved** data-center UI **performance by ~15%** and **reduced** browser **memory overhead by ~25%** by modernizing legacy Google Web Toolkit workflows to Ember.js and Highcharts.
- Embedded **Google Analytics** to **track runtime errors & device telemetry**, successfully deprecating legacy Internet Explorer versions while maintaining Edge, Chrome, and Firefox.

Software Engineer I, Intuit

Feb 2013 – Feb 2015 | Mountain View, CA, USA

- **Improved SEO-performance** of business.intuit.com **by 17%** using **FreeMarker** template. Rebuilt it using **jQuery**, **MongoDB**, and **Java REST APIs**.
- Developed a web app using **AngularJS**, **HTML**, **CSS**, **Java Rest APIs** that mined data with **Java Mail API & MS exchange web services**; Embedded **Google Analytics** tracking.

Software Engineer Intern, Intuit

May 2012 – Aug 2012 | Mountain View, CA, USA

- Developed **Java REST** web services and **MCVS / SPA** based web pages using **DOJO 1.8 AMD JS**, **HTML** and **CSS**.

Software Developer Intern, IBM

May 2011 – Dec 2011 | Littleton, MA, USA

- Built a **multi-threaded** client-server application in **Java** and **Tomcat** for server workload management, handling **concurrent job** execution. Developed **REST APIs** in **JAX-RS**, **Jersey & Tomcat**; **jQuery UI** to track runtime job status.

Software Engineer, Accenture Services Pvt. Ltd.

Aug 2008 – July 2010 | Mumbai, India

- Re-engineered **UNIX** scripts. Built tool using **Java Servlets**, **SQL**, **Oracle** to fetch **Informatica** workflow stats.
- Developed **SAS Base & Macros** code and **SAS Data Integration** Tool jobs to update data warehouse tables.

PROFESSIONAL TRAINING & CERTIFICATION

Introduction to AWS (Amazon Web Services)

Aug 2019

SAS Base Vendor Certification

June 2010

EDUCATION

Master of Science in Computer Science

Sept 2010 – Dec 2012

Northeastern University, Boston, MA

GPA: 3.63 / 4

Courses: REST web services, Algorithms, Web Development, Android Mobile Development, Database Systems

Bachelor of Engineering in Information Technology

Sept 2004 - July 2008

Mumbai University, India

Courses: Software Engineering, Data Warehousing & Mining, Operating System, Object Oriented Analysis and Design
